Introduction from the Government of Canada

IMPORTANT NOTICE

The Government of Canada is phasing out the penny.

Starting February 4, 2013, pennies will no longer be distributed to businesses or financial institutions.

For cash payments and change owed, retailers will decide how to adjust the final cash amount, which may include rounding.

Here's an example of how the rounding works:

Round down		Round up	
\$1.01 or \$1.02	\$1.00	\$1.03 or \$1.04	\$1.05
\$1.06 or \$1.07	\$1.05	\$1.08 or \$1.09	\$1.10

Electronic transactions such as debit and credit cards don't need to be rounded, and will not be impacted.

For further information:

Visit actionplan.gc.ca/penny
or call 1 800 0-Canada.

How SilverWare will Accommodate this Change

In order to comply, SilverWare's SE (often referred to as simply "SilverWare" "SE" or "Classic") and Avrio products will require an upgrade.

With this upgrade, checks paid in cash will have either a negative or positive dollar amount added to round the check to the nearest \$0.05. The system will also track all rounding under a new payment method, so you will be able to see the rounding on your reports.

For SilverWare systems, the minimum version that includes this change will be 2013.x.x

For Avrio systems, the minimum version that includes this change will be 2.x.x.xxxx

Upgrading and Pricing

For our platinum and gold-level contract customers, this upgrade will be free-of-charge if conducted during regular business hours (Mon-Fri 9am-5pm)

For our silver and bronze-level contract customers, this upgrade will cost \$495 + \$150 per station, discounted 25%. Extra fees for after-hours will apply, and there will be no 25% discount if conducted after-hours.

For non-contract customers this upgrade will cost \$495 + \$150 per station. Extra fees for after-hours will apply.
